Compsn. contg. salt of basic peptide and carboxy-terminated polyester - providing controlled, sustained release of active ingredient, formulated as soln., dispersion, microparticles or implant Patent Assignee: ASTRAZENECA AB; ZENECA LTD; HUTCHINSON F G; ASTRAZENECA UK

Inventors: HUTCHINSON F; HUTCHINSON F G

Alerting Abstract: WO A1

Compsn. contains (as made) a salt (A) contg. a cation derived from a peptide (I) having at least one basic gp., and an anion derived from a carboxy-terminated polyester (II). The compsn. is a soln. or dispersion of (A) in a solvent which also dissolves free (II) but not free (I), and in a dispersion the particle size of (A) is below 5 (esp. below 0.2) microns. Alternatively the compsn. exists as microparticles or an implant for injection or subdermal implantation.

Pref. (II) is derived from hydroxyacids or is prepd. by polycondensation of diols and/or polyols with dicarboxylic and/or polycarboxylic acids.

USE/ADVANTAGE - (A) provide extended release (over up to 2 years) of therapeutically active peptide, or where (I) is not itself active they are useful as excipients for sustained release of other, acidic or neutral, peptides. The compsns. are soluble in lipophilic solvents (giving solns. which can be filtered sterile and dried under aseptic conditions) and by formulating with either free (II) or free (I) at least 3 different controlled drug release profiles (continuous; discontinuous or tinned/pulsed) can be achieved. Since (A) are amphipathic, they produce stable aq. dispersions.

# **Equivalent Alerting Abstract:** NL A

Compsn. contains (as made) a salt (A) contg. a cation derived from a peptide (I) having at least one basic gp., and an anion derived from a carboxy-terminated polyester (II). The compsn. is a soln. or dispersion of (A) in a solvent which also dissolves free (II) but not free (I), and in a dispersion the particle size of (A) is below 5 (esp. below 0.2) microns. Alternatively the compsn. exists as microparticles or an implant for injection or subdermal implantation.

Pref. (II) is derived from hydroxyacids or is prepd. by polycondensation of diols and/or polyols with dicarboxylic and/or polycarboxylic acids.

USE/ADVANTAGE - (A) provide extended release (over up to 2 years) of therapeutically active peptide, or where (I) is not itself active they are useful as excipients for sustained release of other, acidic or neutral, peptides. The compsns. are soluble in lipophilic solvents (giving solns. which can be filtered sterile and dried under aseptic conditions) and by formulating with either free (II) or free (I) at least 3 different controlled drug release profiles (continuous; discontinuous or tinned/pulsed) can be achieved. Since (A) are amphipathic, they produce stable aq. dispersions.

Original Abstract: Verfahren zur Herstellung einer Losung oder Dispersion eines Salzes, das aus einem Kation, das sich von einem Peptid mit wenigstens einer basischen Gruppe ableitet, und einem Anion, das sich von einem Polyester mit einer terminalen Carboxyl-Gruppe ableitet, gebildet ist, wobei die Losung oder Dispersion des Salzes in einem Losungsmittel vorliegt, das ein Losungsmittel für den freien Polyester, jedoch kein Losungsmittel für das freie Peptid darstellt, und wobei die Teilchengrosse des Salzes in der genannten Dispersion weniger als 5 mum betragt, das umfasst: (a) Auflosen des Peptids, das wenigstens eine basische Aminosaure enthalt, in Form der freien Base oder in Form eines Salzes mit einer schwachen Saure sowie des Polyesters mit der terminalen Carbonsaure-Gruppe in einem neutralen, polaren Losungsmittel, in dem beide loslich sind, Entfernen des Losungsmittels oder der Hauptmenge des Losungsmittels, und Zugeben der zuruckbleibenden konzentrierten Losung zu einem Uberschuss eines Nichtlosungsmittels für das Peptid-Polyester-Salz, oder br/ (b)...

Claim: Verfahren zur Herstellung einer Losung oder Dispersion eines Salzes, das aus einem Kation, das sich von einem Peptid mit wenigstens einer basischen Gruppe ableitet, und einem Anion, das sich von

Original US Class (secondary): 524832

Original Abstract: This invention relates to novel salts composed of a cation derived from a peptide containing at least one basic group and an anion derived from a carboxy-terminated polyester, processes for the manufacture of such salts, and the use of such salts in the manufacture of extended release pharmaceutical compositions. The salts of the invention possess a variety of properties which are useful in the formulation of extended release pharmaceutical compositions, whether the salts are in pure form or are in admixture with either an excess of the peptide in its free, unbound form or an excess of the free polyester.

Claim: 1. 2.\*\*1\*\*. A composition containing or comprising, as initially made, a salt formed from a cation derived from a peptide containing at least one b asic group and an anion derived from a carboxy-terminated polyester; the composition being in the form of a solution or dispersion of the salt in a solvent which is a solvent for the free polyester but not a solve nt for the free peptide, the particle size of the salt in said dispersi on being less than 5 mum and preferably less than 0.2 mum; or in the form of microparticles or an implant, for injection or sub-dermal implant ation. Original Abstract: This invention relates to novel salts composed of a cation derived from a peptide containing at least one basic group and an anion derived from a carboxy-terminated polyester, processes for the manufacture of such salts, and the use of such salts in the manufacture of extended release pharmaceutical compositions. The salts of the invention possess a variety of properties which are useful in the formulation of extended release pharmaceutical compositions, whether the salts are in pure form or are in admixture with either an excess of the peptide in its free, unbound form or an excess of the free polyester.
